

MIKRO[™]

MIKRO. THE IDEAL DOSE FOR EVERYONE

In a world where excess is everywhere, it can be hard not to go overboard when you're looking to begin integrating edibles into your daily holistic wellness routine. At Mikro, we believe that cannabis should be accessible, and that belief includes ensuring that options for accurately measured microdosing and dosing for canna-beginners are available to Canadians who want them.

Enjoying the health and wellness benefits of edibles shouldn't be a gamble; that's why Mikro edibles help you gauge the exact dose you need for your ideal cannabis experience. With Mikro, you can trust that you'll feel the same effect, every single time, and that you're in control of deciding the right dose for your unique needs.

Finding your perfect dose requires precision. And at Mikro, precision is our priority.

MIKRO[®]

Mikro edibles help you gauge the exact dose you need for your ideal cannabis experience, so you can trust that you'll feel the same effect, every single time. Dose slow: start with one gummy, increasing your dosage by 5-10mg every 90 minutes as necessary in order to allow the gummy to be fully digested and the CBD and THC to be fully absorbed into your endocannabinoid system.
